T. B. BRANDON, Editor

Coleman, Friday, March 4, 1910

**The Road to the Lake**

The attention of "The Miner" has been lately directed to the wretched and pitiful condition of the road leading from Coleman to the lake and Crow's Nest. For a distance of five miles west of Coleman this road is much used by cattlemen, lumbermen and coal mining men. No attempt at all on the part of the government has been made to improve or even repair this road and it is a standing menace to the lives of those who are forced to use it.

Apparently the road never had a proper bed, nor suitable drains. All culverts and bridges, excepting one, are in a dilapidated and deplorable state. Freshets have created dangerous pitfalls that makes travelling not only perilous but tedious. The Board of Trade have taken up the matter once, but as yet nothing has been done, of course the road is out of the jurisdiction of the town council and the proper persons to appeal to is the Alberta government. As was suggested some time ago in the Board of Trade on improvement district, extending from Cowley to the Boundary line, could deal well with all roads and with much better satisfaction than is now being received.

A Prairie and Pass Improvement League was formed, but only one meeting has been held. The handicap this league would have is that it has no power to act, while the councillors of an improvement district have power to borrow money for the purpose of building bridges, roads, culverts, etc. Every town in the Pass would be represented and no doubt every road would be put in a passable state. At any rate, the road to Crow's Nest should receive prompt attention.

**EDITORIAL NOTES**

The blizzard still abated.

Now that the census has been taken we can call another public meeting and advance the incorporation proceedings another step further.

When is a majority of 35 not a majority of 35? All answers to these questions reluctantly answered by Premier Rutherford.

The government is busy this week building a railroad on paper, while all roads, bridges and culverts in need of repair, will have to go unrepaired.

Last year T. Eaton & Co., Toronto, spent less than 5 cents in Coleman. Last year over \$4,000 left Coleman for T. Eaton & Co. These are cold facts.

Bennett and Marshall the two heavy-weight speakers in the legislature have not yet sparred for an opening. In the meantime the lightweight are jockeying for places.

Nearly every town in B. C. and Saskatchewan have subscribed funds to the Board of Trade for publicity purposes, and all towns report that the money expended brings satisfactory returns.

The culvert just west of Slav Town is totally inadequate for the coming freshet in the spring. Slav Town will be again inundated. Slav Town is now under the care of the Coleman council and the matter should be considered.

**Bellevue**

A most successful Basket social was held in the Methodist church Monday evening. After a splendid program, the judges, Messrs. Burnett and Cameron retired to consider where to place the prizes. This was not an easy proposition, for the bidders had taken great pains and maintained the utmost secrecy in their work, so that the baskets were original and various. The prize winning baskets were a pretty heart shaped glove and handkerchief box tastily made up of white silk and satin with carnations and decorations and prepared by Mrs. Callan of the Bellevue hotel. Another was a miniature mine car, a careful likeness in every particular, which took the prize for originality. A basket the judges made honourable mention of was a massive red wax canoe, Minnie ha ha having paddle and suitable ornaments. Among the rest were, such novelties as an Egyptian tower, a coffin, etc. The small sum of \$10.00 was kept hidden Mr. Wm. Chappell gradually sold the baskets to hungry men. One bid on several baskets and grew so hungry that he actually had to buy two baskets to satisfy his cravings. When he came to undertake the carrying of them with his partners he discovered that he needed two or three appetites to succeed. Mr. Chappell got off lighter than was expected, the bidders not being sure of the game and were visibly astonished when at \$7.25 he called for the basket to be laid at his feet. Objections were actually raised but he claimed rightly he had won it in fair fight, though few noticed him put on the last quarter. In all, the evening resulted in a profit of \$112.00 which no doubt will go to reduce the debt on the church.

A large number of the friends of Mr. and Mrs. J. Hatfield gave a surprise party at Mr. Hatfield's residence on Thursday evening. Found by E. Easton, valuable silver watch and chain. Owner can have same by identification and cost of advertisement. An enjoyable social evening was spent last night in the club rooms of the institutional church. An excellent program was rendered. Refreshments were served. Wm. Norrie who was lately with the L.C. & C.Co. & McGillivray Coal Co. has accepted the position of General manager of a new property to be opened up on the Coast and leaves this month to take up his duties there.

The "Witching Hour" which was presented last night by the Summer Stock Co. was enjoyed by all. Owing to there being three other counter attractions the attendance was not as large as usual. Miss Stevenson in the role of the leading lady again demonstrated her great dramatic ability while Mr. Blais was frequently applauded on his characterization of the most difficult parts.

FAMOUS SINGER COMING.  
Under the auspices of the Coleman Hockey Club

It is announced that they have engaged Mr. Robert Melkie and his splendid company as an attraction. There is no performer upon the concert stage so well qualified as is this many young baritone to please all sorts and conditions of people. Endowed with wonderful natural vocal powers, a voice thoroughly developed under the leading masters of the Old World, possessing a graceful carriage and pleasing delivery, Mr. Melkie stands eminently at the head of the vocalists who have toured Western Canada. Reared in Scotland and a devoted student of the Scotch Folk-song, Mr. Melkie still introduces enough variety in his entertainment to thoroughly captivate all hearers.

FINE TAILORED GARMENTS FOR MEN

**Good Clothes Are The Best Spring Tonic.****Try Them**

There are many operations in the making of a garment that can only be thoroughly and satisfactorily accomplished by hand-work and in the 20th Century Brand tailor shops every operation that can be done better by hand than machinery is done by hand.

Successful men know how important Good Clothes are in the battle for recognition.

**'QUALITY'**

You will frequently hear of how well the 20th Century Brand garments hold their shape, no matter how hard usage they are given. The secret of their shape-retaining qualities is no secret at all; it is simply a matter of hand-tailoring, costly canvas, high-priced hair-cloth, silk thread, fine linings, careful inspection, a complete mastery of the details of fine tailoring and a determination to see that they are incorporated in every garment that bears the

**20th Century Label**

Another Strong Feature of 20th Century Brand garments is "Style," and in this respect they are admittedly superior to other makes. So authoritative have the styles bearing this label become that they are widely copied each season, not only by other wholesale tailors, but by exclusive custom tailors—a nice compliment to their excellence in this important detail of fine tailoring.

**Over 400 Styles Cloth to choose from.**

If you are really anxious to make a success of life, wear good clothes

### EASTERN SLOPE FORESTATION

(Continued from last week)

At present only a few of the limits are being worked. The sawmill capacity on the east slope is not large; the present cut per year of 31,651,000 feet has not yet cleared any large area of forest, and will not soon at its present rate of growth consume all the merchantable timber.

That these limits only represent a small proportion of the area of the east slope is due to the incalculable damage wrought by fire; and that the value of the limits is less than should be represented by the amount of timber involved is due to the constant and well founded fear amongst limit holders that a fire may occur to-morrow and to ashes what is to-day worth millions of dollars. The extent of the damage inflicted by fire upon the trade of the country at large, as well as upon the private holdings of lumbermen on the east slope, can hardly be realized. The example of the valley of the Middle Fork of the Old Man River, known as the Alberta side of the Crow's Nest Pass, may be considered representative of the conditions governing between the main line of the Canadian Pacific and the International Boundary. The area of this valley between the Livingstone Range and the summit is approximately 204 square miles. The earliest reports of explorers and geologists state that the whole valley was timbered excepting that comparatively small proportion, not exceeding 20 square miles, which is above timber line. Undoubtedly, the general appearance of the country at present would bear out their reports.

But so numerous and so disastrous have been the fires following in the wake of travellers, settlers and railroads that at present of the original 184 square miles of forest only 39 square miles remain. Nor is this the worst of it. The timber which does escape the fire is that at higher elevation, in the heads of valleys and draws where conditions are not so favorable to the production of heavy stands. The best timber grows in the lower valleys, on the wide exposed benches and terraces, and in the case of fire is always the first destroyed. Anyone with a little patience and a leaning towards statistics would have no difficulty in producing authentic and dazzling figures to show that the destruction in this one valley of the 541 square miles of forest with their 4000,000,000 feet of timber has meant a direct loss millions of dollars in trade and industries.

The damage inflicted upon Western Canada by the burning off of the present forest crop cannot be measured in terms of value of timber alone. The first fire may destroy only the timber. After it a few trees which are left or seed which escaped the fire may suffice to start a new forest, or "second growth" which represents another crop from the land. There are 48 square miles of young timber of this nature coming up in the Crow's Nest Valley; indeed, a survey of the forest of the eastern slope would show a greater area of this young timber than of mature stuff. A second or third fire rarely fails to kill all the forest reproduction, to destroy the remaining seed trees, to burn off the upper layer of soil and leave a desolate waste which must for a long period re-

main unproductive and be absolutely lost to the country.

There is such an area in the Crow's Nest Valley, which before the days of railroad construction and travel was a heavy fir forest but which is now a poor gravelly prairie, unfit for agriculture, of very little value for grazing and which is in no way producing a crop. There are 58 square miles of this worthless land in the Crow's Nest Valley alone. Except a few small areas adapted to ranching it can only produce a revenue by growing timber.

Other industries besides lumbering already feel keenly the results of these fires and fifteen years ago. The Crow's Nest Valley is the home of the Alberta coal fields. The Crow's Nest and Lethbridge mines, now in their first stage of development, already consume annually 3,000,000 feet of props, or the eighty years' growth on one and a half square miles of land. The present mines will, with the development of the country, greatly increase their output. On coal seams already discovered and known to be profitable, new mines will develop until within twenty years the valley of the Old Man River from Burmis to the summit will be one bustling mining camp. The demand for mining props and timber will be enormous and it will be important for the cheap and economical production of coal that they be grown as close at hand as possible. To see that this is done, especially upon land belonging to the Government, is the function of the Government.

The land in this valley, except for narrow strips along the riv-

ers and creeks, is fit only for the growing of timber, and would naturally produce dense stands of the finest mining props were it not for constantly recurring fires. The slow growth of the timber and their absolute dependence upon the promise of large supplies of it has driven the mining companies to ask that the Government take some steps promising relief.

### Fire at Macleod

Macleod Feb. 29—Macleod was visited by a fire to day. It broke out in the Green block shortly before noon. The block was gutted. The loss was \$5,000 to building and \$20,000 to stock a high wind was blowing at the time, making it very difficult to handle. The losses were B. H. Richardson, gentle furnish. Miss Wilson, milliner, and Mathews; also offices upstairs.

Thos. McKay who was injured in the international last evening is in the hospital and is progressing favorably.

It, quite has opened up a real estate office in the pasture road across and has placed a large number of Calgary lots on the Calgary Street. There is no doubt but that Mr. McKay will be successful in his new sphere.

## Thirty Day Slaughter Sale OF Kootenay Fruit Lands

I am instructed by the Columbia River Orchards, Ltd., to place on the market for quick sale their entire Central Park Subdivision on the Columbia River, Kootenay District of British Columbia, consisting of 66 Lots, at from

**\$30 to \$380 per Lot**

\$5.45 to \$31.80 per acre

Terms: \$10 cash and \$10 per month. No Interest. Taxes paid until 1911.

On March 27th, 1910, Mr. J. D. Anderson, B. C. Land Surveyor, wrote us with reference to the Central Park property as follows:

The more I see of this particular block the more highly I think of it. There is no possible doubt but this is very high grade fruit land, and it is a pity that settlers are not already on it. It is so easy to clear, and the land is the characteristic high grade fruit land of this district, that is sure to be in time, a very profitable tract. It compares very favorably with the Doukhobors' land at Waterloo and the McKusie land at Champion Creek below Waterloo, held at \$50 to \$100 per acre.

Never before have B. C. Fruit Lands been offered at such ridiculous prices. Price is no object. These lands MUST BE SOLD within 30 days. The owners have given definite instructions to sell every lot regardless of price. This is, I believe, the first time the public has been given the opportunity to buy Fruit Lands at such prices.

Maps, surveyor's reports on each lot and application forms will be mailed on request.

**The Sale Lasts For Thirty Days Only**
